Abstract (en)
The invention relates to a beverage dispensing assembly comprising a beverage dispensing device and a container containing a beverage. The dispensing device comprises an opening at the top for receiving the container, a lid for closing off the opening and a dispensing handle with an actuator member. The container comprises at its top end a beer conduit connected on one end to said container and on the other end with the actuator for closing and opening of the conduit by operation of the dispensing handle, the container comprising near the top end suspension means projecting transversely from a center line of the container, the dispensing device comprising complementary suspension means for cooperating with the container suspension means, for supporting the container with a bottom end spaced at a distance from the bottom of the dispensing device.
