Abstract (en)  
[origin: EP1243549A1] A device for handling of a hose (5), which device allows pulling out of the hose (5) from a hose storage space (6) and is adapted to return the hose (5) to the hose storage space (6). The device comprises at least two sequentially cooperating hose returning means (8, 9) to allow pulling out and returning of the hose. Moreover, a method for handling of a hose as well as a fuel pump assembly are described.
