Abstract (en)

An awning (1) including a generally horizontally arranged head box having an elongate casing (3) and an end cap (13) on each opposite longitudinal end thereof, a pair of generally vertically arranged hinged drop arms (5), one at each opposite side of the head box, a wall attachment member (11) associated with each of the drop arms carrying a fixed pivot (9) for a lower end of the associated drop arm (5) and an elongate front bar (7) extending parallel to the head box and connected at each of its opposite longitudinal ends to a confronting free end of a relevant one of the drop arms, wherein each wall attachment member extends upwardly sufficiently to receive a protruding connector (23) at a confronting longitudinal end of the head box. <IMAGE>
