Abstract (en)

[origin: EP1243725A2] The closure device has a pull-to aid that drives a drive element (30). A decoupling element (32) mounted on the drive element or on a rotary catch (12) can be moved with the aid of a decoupling and opening mechanism (42,50) from a position in which the drive element engages the rotary catch into a disengaged position in which the rotary catch is released.
