Abstract (en)

Device for draining condensation water for air conditioning units (1) comprising at least an internal unit (2) in which said condensation water is generated, and an external unit (3) equipped at least with a condenser (13) for the frigorific fluid and with a fan (15) generating a forced air flow through said condenser (13), characterized in that it comprises a conveyor (18) putting into fluid communication said internal unit (2) with said external unit (3) so as to convey the condensation water generated in said internal unit (2) onto said condenser (13) of said external unit (3). The conveyor (18) comprises at least a draining tube (19) for condensation water connecting the internal unit (2) with the external unit (3). <IMAGE>
