Abstract (en)

Multiple data-recording devices (DRDs) (2) record feature-related data (FRD). A central processing device (CPD) (5) stores groups of data (DG1,DG2) assigned to the FRD. A data-transmission device (12) transfers data between the DRDs and the CPD and between the CPD and processing units (9). The CPD receives FRD from the DRDs, detects a data group that is associated with the FRD received and that contains first (DG-1) and second (DG-2) data units. An Independent claim is also included for a method for automated management of feature-related and time-related data.

Abstract (de)

Die Erfindung betrifft eine Vorrichtung und ein Verfahren zum automatischen Management von merkmalsbezogenen und insbesondere personenbezogenen Daten und von zeitbezogenen Daten, die besonders für die weitgehend automatisierte Abrechnung von Waren und Dienstleistungen geeignet sind. <IMAGE>
