Abstract (en)

An interactive mobile telephone (10) links to a computer (14) along with an applications server (16), a database (18), a mobile server (20) and an Internet server (22). The applications server carries out calculations and transactions. In relatively short time frames betting numbers are calculated, bets are accepted and betting accounts adjusted via a pay box system/mobile telephone account. A bet profile is communicated to the database and the mobile server. An Independent claim is also included for a computer program with program code devices for carrying out the method of the present invention.
