Abstract (en)

[origin: WO0145738A2] The present invention relates to the use of heat shock proteins to enhance production of one or more chemokines by a cell. The present invention also relates to the use of a heat shock protein in the treatment or prophylaxis of an infectious disease. The present invention also relates to a peptide from an extracellular domain of CCR5 and the use of the peptide in the treatment or prophylaxis of an infectious disease.
