Abstract (en)

[origin: DE10000555A1] The invention relates to a washing bar for a printing press cylinder. Said washing bar is provided with a flexible pressing element (6) that has an arcuate cross-section and whose longitudinal edges (16, 17) are inserted between an inner ledge (12) and an outer ledge (18, 19). The inner ledge (12) is detachably fastened so that it can be retracted from the pressing element (6) in the longitudinal direction of the wash bar.
