Abstract (en)

[origin: WO0146147A1] The present invention provides a process for preparing N-protected-4-substituted piperidines of formula (I) wherein Pg represents a suitable nitrogen protecting group; X represents a heterocycle, substituted heterocycle, substituted alkenyl or substituted aryl wherein the substituted heterocycle, substituted alkenyl or substituted aryl are substituted with from 1 to 3 suitable activating groups; and R<1>, R<2>, R<3>, R<4>, R<5>, R<6>, R<7>, and R<8> each independently represent an alkyl, alkenyl, cycloalkyl, aryl, substituted aryl, heterocycle, or substituted heterocycle, comprising treating a compound of formula (II) wherein the substituents are defined as above, with triethylsilane and trifluoroacetic acid.
