Abstract (en)
[origin: WO0149816A1] The invention relates to a composition which is provided for use in a dishwashing machine and which is provided in the form of a tablet. The composition is characterized by having at least two small parts, which are placed in or on the tablet, and in which at least one functional substance is concentrated in each case thus enabling the respective small part to be released by dissolution at a determined point in time during the dishwashing cycle. Said small parts are produced by using at least two different methods.
