Abstract (en)
[origin: WO0149817A2] The invention concerns microcapsule preparations containing microcapsules that have a core made of a hydrophobic material including at least one odorous or scent substance and a capsule envelope, which can be obtained by i) radical polymerization of ethylenically unsaturated monomers comprising 30 to 100 weight percent of one or more C1-C24-alkylester of acrylic and/or methacrylic acid, 0 to 70 weight percent of one bifunctional or polyfunctional monomer, 0 to 40 weight percent of other monomers or ii) acid-induced condensation of melamine formaldehyde precondensates and/or the C1-C4-alkylethers thereof. The invention also concerns detergent or cleaning agent compositions containing said microcapsules.
