Abstract (en)
[origin: US2002152594A1] The invention relates to a method for producing woven fabrics, especially airbag woven fabrics, while using a multiphase weaving machine with the following steps: weaving a fabric comprised of filament threads in warp and weft on the multiphase weaving machine, whereby a high shrinking type of yarn is used as the warp and an average to low shrinking type of yarn is used as the weft, and finishing the woven fabric by hydroshrinking and/or thermoshrinking.
