Abstract (en)

[origin: WO0136738A1] The invention relates to a de-inked product comprising a portion of newspapers, a portion of magazines and a portion of impurities. The invention provides a de-inked product with reduced cleansing costs associated with the preparation of new paper, offering a higher standard of quality and having a grain size of approximately 20 to 110 mm and a portion of cardboard-containing impurities of less than 1.7 %.
