Abstract (en)
[origin: WO0135264A1] An electronic parking meter system (101) for use with parking enforcement personnel and a plurality of parking meters. The system may comprise parking meter units associated with a respective parking meter, a data unit for gathering data (109) from the parking meter units, a first communication link for transmitting data between the parking meter units and the data unit, at least one parking enforcement unit (111) associated with the parking enforcement personnel, and a second communication link for transmitting data between the data unit (109) and the parking enforcement unit (111).
