Abstract (en)
Household dishwashing machine comprising a washing agents dispenser (1), wherein at least a compartment (3,4) for containing a single dose of solid washing agent as required to execute a single wash programm, and a tank (5) for containing enough liquid additive to perform a plurality of wash programs are delimited. Most part of the dispenser body is assembled inside the machine door (CP), so that a first portion (ZS) of the dispenser (1), delimiting the filling ports (AD,AP,AB) of the compartment (3,4) and/or tank (5) is in line with a first passage delimited in an upper edge (BS) of the door (CP), a second portion (ZI) of said body (2), delimiting at least an outlet for discharging the contents of said compartment (3,4) and/or tank (5) into the washing tub, is in line with a second passage delimited in a drawn area (PI) of the door surface (CP) facing inside the washing tub. <IMAGE>
