Abstract (en)
[origin: EP1245254A2] The layers with a core arranged between them form at least one sandwich component, in which there is at least one anchoring component for retention of a ski binding. The anchoring component (54,55) extends over a part area of a width of the ski (2), and over a part area of the length of the ski. It is formed by a layer, which extends in or parallel to the neutral layer plane (58) of the ski.
