Abstract (en)  
[origin: EP1245387A2] The device (1) for ink supply to an offset printing machine has an adjustment device (2) for varying the color composition of the printing ink. The adjustment device incorporates a mixture unit for a basic ink (5) or a mixed direct color and preferably for a transparent colorless ink carrier (6). The adjustment device is fitted to at least one ink mechanism (12) of a printing machine (3). The adjustment device has at least one control unit (26) and preferably a remote operation arrangement. The control unit is for regulating the mixture unit and on the printing machine a measurement device (25) for printing ink feed is arranged, connected with the control unit.
