Abstract (en)

[origin: DE10114309A1] Label (10) comprises a filling material (14), a base element (18) made of a foil material and having a lower self-adhesive layer (12), and a covering element (19) covering the base element. The filling material is arranged between the base element and the covering element and is tightly sealed by a welded seam (16) connecting the two elements. Preferred Features: The welded seam separates on pulling the covering element away from the base element. The welded seam consists of several parallel individual welded seams formed by heat pressing, ultrasound or laser welding.
