Abstract (en)

[origin: EP1245522A1] The drive unit (8) is raised by means of a hoist in the lift shaft and is finally placed against a mounting (9). After being raised, the drive unit is deposited on auxiliary rails (24) from which it is moved into its final position. The rails are then removed, and the drive unit lifted by means of bolts (30) and lowered onto the mounting.
