Abstract (en)

[origin: GB2357862A] A sales support system where information relating to an article, e.g. a used car, whose sale is requested is stored S12 and presented to a purchaser S18 who requests to purchase an article, and to an auctioneer who sells the article whose sale is requested when a predetermined period of time has elapsed since the information relating to the article for sale was originally stored. The system allows a seller to attempt to sell an article for a predetermined period of time. If the article is not sold by that time, the details of the article are presented to an auctioneer S12, who sells the article at an auction S28.
