Abstract (en)
A cable assembly (40) for connection to an imaging apparatus (10) is disclosed. The cable assembly (40) has at least two layers (330, 340) each of which has at least one ribbon cable (332a, 332b, 342a, 342b) separated from each other by a ground plane (337). The at least two layers (330, 340) are preferably serfed about a cylindrical spacer (300) in concentric arrays. The ground plane (337) can advantageously also be made from a ribbon cable (337). <IMAGE>
