Abstract (en)  
Electronic device or portal (10) for the interaction with domestic automation systems (14), adapted to guarantee the connection and interface between the domotic system (14) installed in houses, and the user or installer (11); said device (10) allows interacting with the domotic system (14) by setting the parameters needed for defining necessary functions and translating such functions into commands to be imparted to each equipment of the domotic system, said electronic device (10) being adapted to transform the data detected by the equipment of the domotic system (14) into useful information for the client or the installer (11). <IMAGE>
