Abstract (en)

[origin: WO0151018A2] The invention concerns cosmetic compositions containing at least an aqueous film-forming polymer dispersion at room temperature without co-solvent, or plasticizing agent. Said dispersions free of organic solvent dry fast and produce homogeneous, bright, non-sticky and abrasion-resistant films. Said dispersions consist of structured polymer particles having one or more domains with soft character ($T_g < 20 \text{ DEG C}$) and one or more domains with hard character ($T_g > 40 \text{ DEG C}$). The invention also concerns the uses of said dispersions in cosmetic compositions, such as nail varnish, mascara or lipsticks.
