Abstract (en)

[origin: US2001008841A1] Operation of a car viewed on a screen of a computer having a controller in a car driving game by pressing or continuing to press simple on-off switches by a user is made into an interface that is easier to use. The operation of the car image on the screen is executed using a recording medium which includes a processing program whereby the program operates the car on the screen in accordance with an output of the controller. The computer has a processing unit that operates the car on the screen according to the output of a controller that has a pressure sensing unit. In addition, a method of using the computer includes detecting the operation pressure of the user on the switches by the pressure sensing unit and generating pressure sensing signals. The car viewed on the screen is operated in accordance with the pressure sensing signals.
