Abstract (en)

[origin: WO0150012A1] The invention relates to a fuel supply system for an internal combustion engine with a fuel pump (1) that can be operated either by an electric drive (19) or by the internal combustion engine (15). The inventive system allows for a good starting behavior of the internal combustion engine (15) and a low power requirement of the fuel pump (1) during the operation of the internal combustion engine (15).
