Abstract (en)

[origin: WO0150341A1] The invention concerns a method for accessing information sources and services on the Web, from a communication device connected via a network to the Internet. Said method comprises: one or several steps of displaying a selection page among a plurality of selection pages in a treelike arrangement and stored locally, each selection page comprising a set of icons including one or several icons providing direct access to the information sources and one or several icons for accessing other selection pages; and a step which consists in transmitting, in response to a selection of an icon providing direct access in a selection page being displayed, the address of the information source corresponding to said icon. The invention is particular useful in communication and office automation equipment, installed in public booths, in enclosed spaces or in private sites or for professional use.
