Abstract (en)

[origin: EP1247550A1] A cut out (19) is formed according to a predetermined pattern, in the upper layers. Inserts (13) of appropriate dimensions are then located in the recess. A polymer barrier film (21) exceeding the size of the cut out is then added, to seal between insert and upper layers (6), blocking adhesive from reaching other surfaces of the layers, during later stages when the ski is molded. <??>An Independent claim is included for a corresponding: polymer film, protective decoration and ski.
