Abstract (en)
A container has a rectangular body (1), a sealing lid (2) hinged to a shorter side, and a top lid (3) arranged to fold downwards and hinged on an upper larger base of the first lid. When closed, the sealing lid clips on the front opening of the body and has a recess to allow fingers to be used to lift the top lid. The body has an arrangement of self-engaging (1.4) and vertical T-shaped (1.5) projections on its upper and lower larger faces (1.3) that support stacking of containers.
