Abstract (en)

A coated grit seal (10) for forming a joint between overlapping strap ends (20,22) includes a layer of grit particle material (26) disposed on an inner surface (18) of the seal (10) and at least one layer of a coating (28) applied over the grit particle material (26). The coating (28) prevents loosening of the grit (26). A method for preventing the loosening of the grit particle material (26) includes applying at least one layer of a coating (28) over the grit particle material (26). <IMAGE>
