Abstract (en)  
[origin: EP1247758A1] The protective cap (4) has a removable small plate as an originality seal located in the region of the can's central opening. The small plate is designed as a delivery head (10) with a delivery passage and is suitable for fitting on the discharge stem (3) of the can as well as being separable from the protective cap. The delivery head is fastened within the dimensions of the protective cap and in this position allows no unauthorized removal. The delivery head is manufactured in an injection molding process with at least one part of the protective cap.
