Abstract (en)
[origin: EP1247904A2] Road finishing machine comprises a chassis arranged on a base machine (1) with a front and a rear front wheel pair (3, 4). A bucket (5) holding material (6) is arranged at the front of the base machine and a board (8) adjustable in the transport position is hinged to the rear of the base machine. The two front wheel pairs are arranged below the bucket and the front and rear front wheels on each side have a single-wheel suspension with hydraulic leveling. The front wheel pair arranged at the front in the direction of travel can be hydraulically separated from the rear front wheel pair and released from the ground.
