Abstract (en)

[origin: EP1247914A1] The elements comprise a first section (2) having a longitudinal groove (2a) in which two castors (5) are inserted. A rod connects each castor with an upright in a direction perpendicular to the groove. A watertight fixing comprising a flat ruler for a cover plate (C) extends parallel to the first section between the castors. A second section (4b) engages the ruler to clamp the cover plate on the ruler.
