Abstract (en)

[origin: EP1247996A1] The arrangement has a number of electrically operated valve units with first electrical connection arrangements for actuating signals. The units are arranged in series to form an assembly with the connection arrangements in a row and in contact with second connection arrangements (37) on flexible cable runs (57) of an actuation signal distributor (28). The flexible cable runs are combined to form a flexible strip cable (42).
