Abstract (en)

The heating device (2) has a housing (5) with an internal combustion zone. A fuel inlet (7) covered by a removable lid (8) includes a combustion air inlet with combustion gases removed through a chimney (13). A heat exchanger (10) mounted above the combustion chamber has multiple water tubes (11) with gills (12) to improve heat transfer. Guide tubes (15,18) control water flow through the water tubes (11).
