Abstract (en)

[origin: EP1248251A2] The conversion method has entered text information data (5) converted into synthetic speech information data (6) using a speech profile (3) obtained by analysis of sample speech data entered via a user, to allow the spoken text to approximate the speaking voice of the user. Also included are Independent claims for the following: (a) a system for automatic conversion of text information into speech information; (b) a mobile telephone with a system for automatic conversion of text information into speech information
