Abstract (en)
[origin: WO0152925A1] A pen needle assembly (30) for connecting onto a medication delivery device (10) to deliver medicine to a patient directly through the pen needle or through a catheter (70). The pen needle being attached to the medication delivery device by a cap (40), such that, the needle of the pen needle does not twist while being inserted into the cartridge of the medication delivery device. An adapter (50) can be attached to the pen needle so that a catheter connector (62) can be connected to the adapter without being damaged by the pen needle.
