Abstract (en)

[origin: WO0153000A3] The invention relates to a powder coating arrangement comprising a powder cabin (10) having a coating chamber (12) for coating workpieces (16) with powder and a conveyor (30) for transporting the workpieces (16) through the coating chamber (12). The conveyor (30) is situated underneath the coating chamber (12). Particularly high-quality powder coatings can be produced using such an arrangement as dropping of particles from an overhead conveyor is avoided.
