Abstract (en)
[origin: WO0151367A1] A beverage package comprises a primary container (1) for a beverage (6) and a secondary container (10) for a component (11) is positioned in the primary container (1) to add the component (11) to the beverage (6) prior to consumption of the beverage (6). The beverage (6) is maintained under a pressure greater than atmospheric pressure in the primary container (1) and the secondary container (10) and is operable to introduce the component (11) into the beverage (6) when the primary container (1) is opened to release the pressure.
