Abstract (en)  
[origin: WO0149922A2] The invention relates to a laundry bag comprising at least one spreading element (3) having at least one suspension component (5). The inventive bag also comprises a filling or removal opening (2) which is embodied in a slit-shaped manner and extends essentially in the vertical direction. The invention is characterised in that the length (L) of the filling or removal opening (2) amounts to 40 to 69 % of the height (H) of the laundry bag and that the upper end of the filling or removal opening (2) is situated at a distance from the upper edge of the inventive bag, whereby said distance is 10 to 20 % of the height (H) pertaining to the laundry bag. The invention also relates to configurations and embodiments.
