Abstract (en)
[origin: CA2398190A1] Roll-changing apparatus for a multi-nip calender an upright part (10) of the roll-changing apparatus having at least one vertical column (11), to which at least one horizontal beam (12) and, at its lower end, a carrier part (13) belong, and a roll-changing apparatus (1) of the roll changing apparatus further including a vertically moveable lifting carriage (14) which is fitted to the vertical column. According to the invention for transporting the rolls (21,22) of the calender (2) in the lateral direction from the calender to the roll store (3) and vice versa, the roll-changing apparatus (1) can be conveyed between calender and roll store, while the lifting carriage (14) of the roll - changing apparatus (1) is immovable in the lateral direction with respect to the vertical column (11).
