Abstract (en)
[origin: EP1249256A1] The bridge for the protection of a hose, on or under roads, has a trapezoid body (1) as seen on a side view. The center section has a lateral opening to take the laid hose or pipe at the upper or lower side of the body. A vertical stem is between neighboring openings. The openings are fitted with swing locking bolts (8) to secure the laid hoses/pipes in them. The trapezoid body is of rubber or plastics.
