Abstract (en)
[origin: EP1249277A2] A crushing plant, comprising a cage containing a motor-driven hammer rotor (3) and presenting a loading mouth (22) for the material to be crushed, there being associated with said mouth a movable closure member (8) able to be positioned in a rest position in which it lies outside the path followed by the material, or a working position in which it intercepts said path. <IMAGE>
