Abstract (en)

[origin: EP1249285A2] The connector for building heating pipework has three connecting pipe stubs (16,18,22) connected to a central flow connection (14). The connector has a casing (12) containing two end stub pipes formed integrally. The third stub pipe (22) is formed as a separate section. The main casing and stub pipes have a common diameter but the additional stub pipe (22) is smaller.
