Abstract (en)

[origin: US6471014B1] The invention relates to a device for operating elevators in a special mode which comprises at least one control element for controlling at least one allocated functional unit of the elevator. At least one indicator is assigned to the functional unit, which indicates at least one condition of the functional unit that can be influenced by one or several control elements and which can be perceived by the operator of the one or several control elements.
