Abstract (en)
The transparent cover (10) is of a slightly inclined shape and has a short tube-shaped extension (18) in the center for being joined to the plant support stick (12). An upwards pointing flange (20), located at the outer rim and provided with a multitude of holes (22) serves as a rain water collecting and deflecting device. The central area can also be fitted with a sleeve, held with a screw, for a more reliable connection. The contour of the cover (10) can be round or rectangular, in case of the latter, several covers (10) can be joined in order to serve as a mini-greenhouse or a cold frame.

Abstract (de)
Die Erfindung betrifft einen Ofenbaustein mit einem Frontteil mit Sichtseite und Rückseite sowie zwei voneinander beabstandet von der Rückseite abstehenden Seitenteilen, zwischen denen ein Rückteil unter Ausbildung eines Hohlraumes im Innern des Ofenbausteines einsteckbar ist, wobei der Hohlraum an zwei gegenüberliegenden Enden des Ofenbausteines zugänglich ist. <IMAGE>
