Abstract (en)  
A multi-flow type sub cool condenser (1000) comprises a first header pipe (1), having at one end a plugging mechanism (100, 200, 300, 400) in which a plugging member can be fastened or unfastened at will manually and which enables a desiccant (13), having a length comparable to that of said first header pipe, to be put in and taken out of said first header pipe. A second header pipe (2), the interior of which is sectioned into two chambers (2a,2b) by a partition plate (8). A plurality of flat heat transfer tubes (4) interconnect said first and second header pipes, and a plurality of corrugated fins (5) are interposed between said flat tubes (4). <IMAGE>
