Abstract (en)

[origin: EP1249850A2] The housing has holding devices (12,13,14,15) arranged on the outside wall of the housing for positioning an annular control electrode (21,22,23,24). At least one holding device includes clamping surfaces distributed over a periphery of the insulating housing and arranged to form a receptacle (17,18,19,20) in which the control electrode can be positively fixed.
