Abstract (en)

[origin: WO0154543A1] A concealed device (10) for fitting a wall unit comprises a plate (11) designed to be fixed to the wall unit, a coupling element (12) connected to the plate (11) and designed to engage in a support fixed to the wall, a first screw (13) acting between the plate (11) and the coupling element (12) to adjust the latter to a vertical position with respect to the plate (11) and a second screw (14), the end of which is fitted with the coupling element (12), for adjusting the distance between the coupling element (12) and the plate (11). The plate (11) is provided with a number of fixing pins (15) positioned all along one side (16) of the plate (11) and symmetrically with respect to a centre line of the device (10).
