Abstract (en)

[origin: WO0154661A1] The present invention relates to an article suitable for cleansing wherein the article comprises: (a) a substrate sheet which comprises: (1) a first substrate layer; and (2) a second substrate layer attached to said first layer; (b) a cleansing component disposed adjacent to said substrate sheet; and (c) a therapeutic benefit component disposed adjacent to said substrate sheet wherein said therapeutic benefit component occupies less than about 50 cm<sup>2</sup> of the substrate sheet per gram of therapeutic benefit component. In a preferred embodiment, the present invention also relates to the above-described article wherein the second substrate layer is sealed to the first layer to thereby form at least one reservoir seal in at least one surface of said substrate sheet wherein the reservoir seal is in a form selected from the group consisting of shapes, designs, logos, and combinations thereof. In another embodiment, the cleansing article of the present invention may be modified to impart solely therapeutic benefits. This article comprises: (a) a substrate sheet which comprises: (1) a first substrate layer; and (2) a second substrate layer attached to said first layer; and (b) a therapeutic benefit component disposed adjacent to said substrate sheet wherein said therapeutic benefit component occupies less than about 50 cm<sup>2</sup> of the substrate sheet per gram of therapeutic benefit component. The present invention further relates to methods of use for the articles disclosed.
